

ANNEX- Information showing that the relevant requirements of paragraph 6 of article 3 have been met:

In 2017, Canada introduced comprehensive restrictions on the export of mercury by only allowing export of mixtures that contain elemental mercury at a concentration of 95% or more by weight that:

- a) is, or is contained in, a hazardous waste or hazardous recyclable material regulated by the *Export and Import of Hazardous Waste and Hazardous Recyclable Material Regulations*;
- b) is exported for use in a laboratory for analysis, in scientific research or as a laboratory analytical standard, if the total quantity exported by the exporter during the calendar year in question does not exceed 10 kg; or
- c) is contained in a manufactured item that during manufacture is formed into a specific physical shape or design and has for its final use a function or functions wholly or partly dependent on its shape or design.

All other exports are not allowed. These comprehensive restrictions on mercury export have been enacted by amending Schedule 3 of the *Canadian Environmental Protection Act (Export Control List)* and the *Export of Substances on the Export Control List Regulations*.
