**Subject:** Canada- submissions for Releases - calculation methods

Dear Eisaku,

I would like to provide some information from Canada on methodologies for the calculation of releases. Canada's [National Pollutant Release Inventory](#) requires annual reporting on emissions and releases from facilities.

Here is a specific link to Canada's guidance on tools for calculating and reporting emissions and releases. This page contains many more links, some of which may be useful to the Releases expert group.  
<https://www.canada.ca/en/environment-climate-change/services/national-pollutant-release-inventory/report/tools-calculating-emissions.html#n9>

Regards,  
Alison
