

## **PART 1: LESSONS-LEARNED FROM THE PLANETGOLD INDONESIA PROJECT TO ADDRESS THE NATIONAL TARGET ON MERCURY REDUCTION AND ELIMINATION**

The planetGOLD Indonesia project GOLD-ISMIA, a five-year project partnership of the Direktorat Jenderal Pengelolaan Sampah, Limbah dan B3, Pusat Teknologi Pengembangan Sumberdaya Mineral and UNDP Indonesia funded by the Global Environment Facility, is participating on the COP-4 side-event through the online webinar with the topic of “Lessons-learned from the planetGOLD Indonesia Project to address the National Target on Mercury Reduction and Elimination”. In the webinar, the project will share information about the strategy to achieve the mercury reduction targets, the lessons-learned to select mercury-free alternative technologies, and the gender mainstreaming in ASGM sector.
