

MERCURY HEALTH RISK COMMUNICATION

SPEAKERS

The secretariat of the Minamata Convention co-organizes with the International Conference on Mercury as a Global Pollutant (ICMGP) a series of Minamata Online sessions, related to the four ICMGP synthesis papers to be published in early 2023. This is the second one of four sessions focusing on risk communication, convened with the synthesis paper authors, other health scientists and intergovernmental organizations. Based on the best available knowledge/information on human health risk of mercury, the panelists will discuss opportunities and challenges in communicating health risk to the public and the professionals.

Niladri Basu, McGill University, Canada

Eva Krümmel, Inuit Circumpolar Council

Andromachi Katsonouri, Cyprus State General Laboratory

Ashley Bastiansz, McGill Univ., Group on Earth Observations

Irina Zastenskaya, World Health Organization
